

"During 2008, our residential property development company engaged TMS to carry out the design and construction of a landing stage to the frontage of a major Victorian villa located on the River Dart. Throughout the entire process from consultation, design and construction, the relationship between client and contractor was excellent at all times, with workmanship and attention to detail of the highest order. For any other works of this nature, I would not hesitate to use the services of TMS"

T.Scruby – Director, Data Financial Services Limited

Why TMS?

- As specialists in marine-based construction projects we offer you peace of mind that your completed landing stage will more than meet your expectations
- You have one company to deal with – we manage the whole project, saving you time and reducing complexity
- Works are carried out from the water, minimising disruption at your property

About TMS

TMS has been providing marine civil engineering services since 1991. Based in South Devon, we have 20 employees and all of our people are CSCS and CPCS registered where appropriate and our boat crew hold RYA and MCA qualifications, as well as being qualified in first aid, fire fighting and sea survival. Our HSE registered dive personnel are all coded wet welders.

We are full members of the BMF (British Marine Federation) and of the ADC (Association of Diving Contractors) as well as being ISO 9001 accredited. TMS is also certified by Constructionline, the UK register of pre-qualified construction services.

- **Pontoons**
- **Jetties**

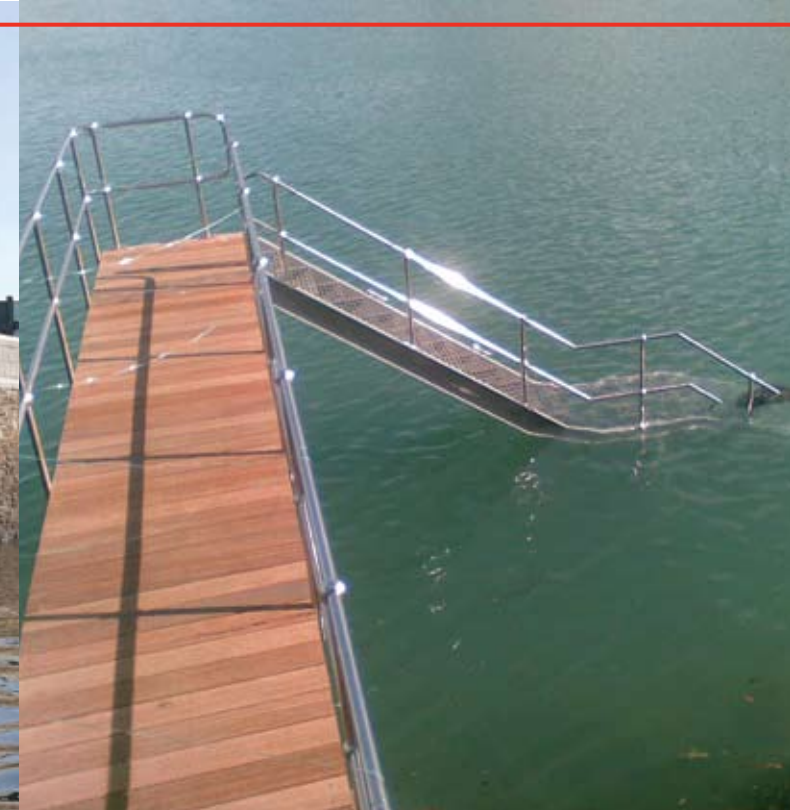

Property Improvement

A new landing stage may enhance the aesthetic appeal of your waterside property. It may be an investment opportunity.

You may wish to **replace** an old jetty that has fallen into disrepair, or you may simply require a new landing stage for your **pure enjoyment** and **convenience**.

- Marine civil engineering specialists
- Choice of design, materials and finish

Your choice of landing stage

All of our works follow the bespoke specifications and requirements of our clients. Each landing stage can be tailored and customised to your exact requirements.

From the design specification and materials to the paint and finish, we can create the landing stage that transforms your waterside and fulfils your home and boating needs.

We also build mini marinas, access bridges, bespoke mooring pontoons and boat houses.

Customer Service

Whatever your needs, we pride ourselves on the delivery of a high quality service – from planning and design through to construction and completion.

We offer a total project management solution if required, from planning application, licensing and liaison with the architect through to ensuring your landing stage is completed to your entire satisfaction, on time and on budget.

Our flexibility, professionalism and attention to detail ensure that most of our work comes from personal recommendation.

Health & Safety

At TMS, safety is always front of mind. As part of our Health & Safety policy, all of our boats and equipment are regularly maintained to a very high standard and adhere to the latest MCA specifications.
