

TMS Maritime is a leading UK specialist in marine civil engineering, ancillary floating plant and diving services

Client: **Morrisons Supermarkets Plc.**

July 2013

Project: **Sheet Piling**

### Requirement:

Sheet Piling of fuel tank area, on the Petrol Station facility at Morrisons new supermarket in Gloucester.

### Solution: ▼

Using the TMS Plant Ltd new Doosan/Movax, side-grip vibratory piling hammer, site efficiency was optimised as a result of high speed installation.

Working with **ISG**, the principle contractor, TMS Plant has undertaken the piling on the new Morrisons Supermarket Petrol station at Gloucester.

The contract required the insertion of 6 metre sheet piles surrounding the fuel tank location and was achieved at a very high productivity speed of less than 3 minutes total cycle time per pile (in difficult ground conditions). To see this piling video, 'click' on one of the images below.

The new TMS Plant (2013) Doosan/Movax side-grip vibratory piling hammer combination can achieve fast pile driving times with sheet, tube, H-section or greenheart piles.
